

Clyfford Still Museum

case study
By Elia Magari

Location: Denver, Colorado

Architect: Allied Works Architecture

Owner: Clyfford Still Foundation

Year of completion: 2010

Climate: HTropical and Subtropical Steppe

Material of interest: concrete

Application: ceiling

Properties of material: Skylights are shroud with a cast- in-place, perforated concrete ceiling. The geometry of the openings in the ceiling is designed to create an even field of soft and changing daylight in the galleries.
